OC-MLS WEEKLY STAFF NOTES  
FOR WEEK OF 7-11 MAY 1984

25X1

1. C/MLS traveled to [ ] to view various potential sites for a base station which will serve as a back-up to [ ]

25X1

25X1

2. Two OC FY-1986 New Initiatives, Intelligence Community Support and Global Teleprocessing Capability, were changed as a result of further Comptroller/Directorate review. Soft Copy Imagery was deleted from Intelligence Community Support and Global Teleprocessing Capability was restructured as a Zero Initiative in FY-1986. OC FY-1986 New Initiatives now total a modest \$2.0 million compared to a base and ongoing level [ ] million.

25X1

3. The April trend reports have been reviewed and analyzed. The Office is well on its way to achieving its financial management objectives for FY-1984. The spending plans, processes for identification of shortfalls and unfunded requirements, and related coordination activities are working well.

5. Efforts to automate the OC budget and program activity continued with the acquisition of Wang's Multiplan Program for PP&BG applications.

25X1

6. [ ] attended the NCS Representative meeting on 10 May at the FEMA Headquarters in Washington, D.C. GSA spoke on the STU-II program, [ ] and NASA surfaced their concern about the EPA proposing to change the formula for determining radiated power. An MFR was prepared on these subjects.

OC-MLS Weekly Staff Notes, 7-11 May 1984 (Continued)

25X1

8. C/SINAG contacted ORD concerning an RFP which was recently released for development on a Secure Fiber Optics Communications Base. CSD had been coordinating with the program until last November but was told in January that it was on hold. CSD is on the Source Selection Board and will be kept apprised of project status (if it pursues it aggressively). The researcher claimed to have coordinated adequately and attributed the problems to OC. The argument shall remain moot as long as proper liaison with CSD is maintained.

9. The May KG-84 delivery of 60 units was received 10 May. SINAG has scheduled an allocation meeting for 16 May.

25X1

11. The CRAFT Program Office met with officers from the Communications School and the Foreign Networks Division to discuss the CRAFT maintenance philosophy. It was the consensus of the group that field facilities should be supplied with a complement of Wang spare parts and spare circuit boards. That will entail the procurement of additional Wang equipment which will be cannibalized. The components will then be assembled into field kits.
